## TECHNICAL PROJECT HIGHLIGHTS

---

### Task Manager App | *React, TS, Redux, React-Bootstrap*

[GitHub Repository](#) | [Live Page](#)

- Developed manage tasks application
- Implemented the following functionality:
  - create/delete/edit tasks
  - display tasks
  - set or unset the status of the task as 'done' or 'in progress'
  - filter tasks by status
- Implemented data storage in Local Storage
- Implemented inputted field validation

### Trip App | *React, TS, Redux, RTK Query, Redux-persist, Vite, Jest*

[GitHub Repository](#) | [Live Page](#)

- Developed the application fTrip app with countdown timer and weather forecast
- Implemented the following functionality:
  - select a trip from the list
  - display today's weather forecast for the selected trip city
  - display forecast for each day of the trip
  - search for a trip
  - adding a new trip
  - countdown timer from the current date to the start date of the trip

### Beer App | *React, CSS, React-Query, Zustand*

[GitHub Repository](#) | [Live Page](#)

- Developed the application that should display a list of beers. Users should be able to scroll through a list of beers and to view a single beer
- Implemented the following functionality:
  - display a list of beers
  - multiple selections of beers
  - delete selected beers from the list
  - deselect beer
  - display detailed information about the picked beer

## EDUCATION

---

### Levi9 Frontend Boost Program
